

## Systematic Methodology for Real-Time Cost-Effective Mapping of Dynamic Concurrent Task-Based Systems on Heterogenous Platforms

Filesize: 2.33 MB

### ***Reviews***

*A whole new eBook with a brand new point of view. It is definitely simplistic but shocks in the 50 percent of the publication. I am just pleased to explain how this is the greatest ebook i have read during my very own daily life and could be he best ebook for possibly.*

## SYSTEMATIC METHODOLOGY FOR REAL-TIME COST-EFFECTIVE MAPPING OF DYNAMIC CONCURRENT TASK-BASED SYSTEMS ON HETEROGENOUS PLATFORMS

To save **Systematic Methodology for Real-Time Cost-Effective Mapping of Dynamic Concurrent Task-Based Systems on Heterogenous Platforms** eBook, remember to refer to the web link below and save the file or gain access to additional information which are have conjunction with SYSTEMATIC METHODOLOGY FOR REAL-TIME COST-EFFECTIVE MAPPING OF DYNAMIC CONCURRENT TASK-BASED SYSTEMS ON HETEROGENOUS PLATFORMS ebook.

Springer-Verlag Gmbh Sep 2007, 2007. Buch. Condition: Neu. Neuware - This material is mainly based on research at IMEC and its international university network partners in this area in the period 1997-2006. In order to deal with the concurrent and dynamic behaviors in an energy-performance optimal way, we have adopted a hierarchical system model (i.e., the gray-box model) that can both exhibit the sufficient detail of the applications for design-time analysis and hide unnecessary detail for a low-overhead run-time management. We have also developed a well-balanced design-time/run-time combined task scheduling methodology to explore the trade-off space at design-time and efficiently handle the system adaptations at run-time. Moreover, we have identified the connection between task-level memory/communication management and task scheduling and illustrated how to perform the task-level memory/communication management in order to obtain the design constraints that enable the this connection. A fast approach is also shown to estimate at the system-level, the energy and performance characterization of applications executing on the target platform processors. 264 pp. Englisch.
