This pdf might be well worth a study, and a lot better than other. It really is simplistic but excitement inside the fifty percent in the book. Its been printed in an exceedingly straightforward way which is just after i finished reading this ebook through which really modified me, modify the way i believe.

Excerpt from A Dissertation on Employing Emulation to Encourage Literary Excellence The work of education is but half completed, if, by the imperfection of the system, wrong principles have been brought into action; or if any good principles have been left to slumber in neglect and inaction. That system is far from being perfect, how much soever it may be entitled to our regard, which, while it improves the more obvious principles of the mind, suffers others of greater importance to lie dormant; or, what is worse, cultivates those principles which were never implanted in us for cultivation, and which, as they become matured and strengthened, become a torment to their possessor and to mankind. A state of idleness is sufficiently replete with misery, and a mind unemployed is liable to become an organ of incalculable mischief, as well as a burden to itself; but it were better that it should remain even wholly uncultivated, than that it should be taught how to employ its energies in communicating an injurious influence to society. It is comparatively easy to lead the young mind forward, and excite in it a love of study, by rewarding it with the gratification of some predominant desire; but the most difficult part is to create in it a love of study for its own sake. We should censure that man s conduct who should place the most noxious weeds by the side of some choice plant; for though his object might be to nourish it into strength and beauty, yet the proximity of a luxurious weed would wholly absorb the richness of the soil, and destroy that very effect which it was designed to produce.
