

Learning and Memory: A Comprehensive Reference, Four-Volume Set (Hardback)

By -

Elsevier Science Publishing Co Inc, United States, 2008.
Hardback. Condition: New. New.. Language: English . Brand New Book. The study of Learning and Memory is a central topic in Neuroscience and Psychology. It is also a very good example of a field that has come into maturity on all levels - in the protein chemistry and molecular biology of the cellular events underlying learning and memory, the properties and functions of neuronal networks, the psychology and behavioural neuroscience of learning and memory. Many of the basic research findings are directly applicable in the treatment of diseases and aging phenomena, and have found their way into educational theory and praxis. Learning and Memory: A Comprehensive Reference is the most comprehensive source of information about learning and memory ever assembled, and the definitive reference work on the topic. In four volumes, Editor-in-Chief John H. Byrne (University of Texas), together with volume editors Howard Eichenbaum (Boston University) for Systems and Neuroscience, Randolph Menzel (Freie Universitat Berlin) for Behavioral Approaches, Henry Roediger (Washington University) for Cognitive Psychology, and David Sweatt (University of Alabama, Birmingham) for Molecular Mechanisms, have put together a truly authoritative collection of overview articles in 159 chapters on over 3000 pages....
